 Urban Sustainability Exchange (USE)
use.community@metropolis.org

For and from citymakers around the globe

use (urban sustainability exchange) is an online learning tool and open knowledge exchange platform dedicated to sustainable city making. **use** connects citymakers and encourages the exchange of ideas and experiences to effect positive sustainable change.

use. learn. explore.

Learning tool

- **use** hosts a growing database of international case studies that incorporate the SDGs into innovative urban practice
- Each case study provides a detailed description of a project, programme or policy, including background, challenges, lessons learned, impacts and an assessment of the transferability potential to another location
- All case studies are reviewed, edited and updated by a professional editorial team

Platform for exchange

- **use** engages with a professional network of urban practitioners, policy makers, city administrators, academics and researchers
- Create a **use** community member profile to promote your work and skills as well as to connect to other Citymakers
- Upload case studies and increase the visibility of your projects
- Benefit from our editorial support and translation services for your case studies
